Keeping LG Add Sitename up-to date

Did you know that LG Add Sitename is MSM compatible and plays well with [LG Addon Updater](#)?

LG Addon Updater is a recommended download which will notify you when LG add sitename is updated.

Features

LG Add Sitename is a simple ExpressionEngine extension inspired by [Ryan Masugas Add Sitename Extension](#).

This extension allows you to add any html and css to the ExpressionEngine administration header including images, flash or any other html element. UTC and user localised time can also be displayed in the header which will help with debugging timezones.

The extension comes with default settings that adds a light grey piece of text with the site's name to the ExpressionEngine administration header.

LG Add Sitename is Multi-site Manager compatible and will notify site administrators when an update is available if [LG Addon Updater](#) is installed.

Show Time? [required]

Yes | No

Times will be displayed in the header in the following format:

Server Time: Fri Aug 22 15:07:45 EST 2008
 EE UTC Time: Fri Aug 22 5:07:45 UTC 2008
 PHP UTC Time: Fri Aug 22 5:07:45 UTC 2008
 Localised Time: Fri Aug 22 15:07:45 2008
 Localised EE Human Time: 2008-08-22 03:07 PM

These times are really helpful when trying to debug server, user and localisation issues. This feature is more of a present to ExpressionEngine extension developers more than anything else.

Enable CP admin page title replacements? [required]

Yes | No

The title meta tag will be replaced with an alternative string.

Replace 'ExpressionEngine' with...

leevigraham.com

The string which is used if "Enable CP admin page title replacements?" is enabled.

Check for updates?

Yes | No

LG Add Sitename can call home and check for recent extension updates. **This feature requires [LG Addon Updater](#).**
