ANOTHER **NEWISM** CREATION

LG .htaccess Generator requires [ExpressionEngine 1.6+](#) and an existing .htaccess file with write permissions (the file can be blank). Update notifications will only be displayed if [LG Addon Updater](#) is installed.

Installation

The LG .htaccess Generator extension package contains an extension and a language file. To install LG .htaccess Generator follow the instructions below:

- [Download](#) the latest version of LG .htaccess Generator
- Extract the .zip file to your desktop
- Copy extensions/ext.lg_htaccess_generator_ext.php file to your /system/extensions directory
- Copy the language/english/lang.lg_htaccess_generator_ext.php file to your /system/languages/english directory
- Open the [Extension Manager](#)
- Enable Extensions if not already enabled
- Enable the extension
- Configure the extension settings

Configuration

LG .htaccess Generaot has the following extension settings **which must be entered separately for each Multi-Site Manager site**:

- [Enable](#)
- [Directory Settings](#)
- [.htaccess Rules](#)
- [Check for updates](#)

Enable

Yes | No

Enable LG .htaccess Generator for this site?

The server directory where your .htaccess will be generated

/usr/local/var/www/html/my-site/

LG .htaccess Generator will use this directory to look for an existing .htaccess file and add the custom rewrite rules. If the file contains existing rules these will not be modified.

.htaccess Rules

```
# secure .htaccess file
<Files .htaccess>
  order allow,deny
  deny from all
</Files>

# Dont list files in index pages
IndexIgnore *

# EE 404 page for missing pages
ErrorDocument 404 /index.php?/{ee:404}

# Simple 404 for missing files
<FilesMatch "(\\.jpe?g|gif|png|bmp)$">
```

```

    ErrorDocument 404 "File Not Found"
</FilesMatch>

RewriteEngine On

RewriteBase /

# Remove the www
RewriteCond %{HTTP_HOST} ^www\.(.+)$ [NC]
RewriteRule ^ http://%{HTTP_HOST}%{REQUEST_URI} [L,R=301]

# Rewrite homepage urls that have the Google Analytics query string
# CampaignMonitor adds the query string in their emails
# "site" is the template group
# "index" is the template name
# The template group and template should point to your sites index
RewriteCond %{QUERY_STRING} ^utm_medium
RewriteCond %{REQUEST_URI} ^/$ [NC]
RewriteRule (.*?) /index.php?/pages/index/&{%QUERY_STRING} [L]

# Add a trailing slash to paths without an extension
RewriteCond %{REQUEST_FILENAME} !-f
RewriteCond %{REQUEST_URI} !(\.[a-zA-Z0-9]{1,5}|/)$
RewriteRule ^(.*)$ $1/ [L,R=301]

# Remove index.php
# Uses the &quot;include method&quot;
# http://expressionengine.com/wiki/Remove_index.php_From_URLs/#Include_List_Method
RewriteCond %{QUERY_STRING} !^(ACT=.*?)$ [NC]
RewriteCond %{REQUEST_URI} !(\.[a-zA-Z0-9]{1,5})$
RewriteCond %{REQUEST_FILENAME} !-f
RewriteCond %{REQUEST_URI} ^/{(ee:template_groups|members|P[0-9]{2,8})} [NC]
RewriteRule (.*?) /index.php?/site/index/&{%QUERY_STRING}

```

If you **are** using the Pages or Structure module make sure you add: `{ee:pages} |` into the include string after `{ee:template_groups}`.

The `.htaccess` rules will be added to your `.htaccess` file after the following special tags are replaced:

- `{ee:template_groups}` will be replaced with a pipe delimited list of this sites template groups.
- `{ee:pages}` will be replaced with a pipe delimited list of this sites page urls.
- `{ee:404}` will be replaced with the sites 404 path ie: `site/404`.

For more information about the default `.htaccess` rules [visit my official launch post](#) on [newism.com.au](#).

Read more about the "[Include List Method](#)" of removing your sites `index.php` on the ExpressionEngine Wiki.

Check for updates?

LG `.htaccess` Generator can call home and check for recent extension updates. **This feature requires [LG Addon Updater](#)**.

Usage

LG `.htaccess` Generator has no special usage requirements. Everytime a template group is created or modified or a weblog entry is created or modified LG `.htaccess` Generator will kick in an update the `.htaccess` file. A status update will be presented to the editor.

Change Log

1.0.0

- Initial Release w/ documentation

License

LG .htaccess Generator is a free commercial product and therefore its usage is subject to the [commercial license agreement](#).
