Installation

LG Member Form Customiser extension contains an extensions & language folder. To install the module follow the instructions below:

1. [Download the latest version of the extension](#)
2. Extract the .zip file to your desktop
3. Copy the `system/extensions/ext.lg_mf_customiser.php` directory to your `/system/extensions` directory
4. Copy the `language/english/lang.lg_mf_customiser.php` file to your `/system/languages/english` directory

Activation

This extension has no special activation requirements. To activate:

1. Log in to your sites administration
2. Open the [Extensions Manager](#)
3. **Enable Extensions** if not already enabled
4. **Enable** the extension

Configuration

LG Member Form Customiser extension includes a couple of settings which are all self explanatory. Each setting displays or hides one of the custom fields.

Version 1.1.0 introduced a new feature than allows you to hide different fields for different member groups. This is accomplished by removing unwanted profile attributes from the member profile form.

To remove profile attributes from a group first declare the group id followed by a pipe delimited list of profile attribute rows separated by a colon.

Each member group must and target profile attributes must be declared on a separate line. An example of this is:

```
group_id:row_num|row_num|row_num
```

So to remove attributes 10 & 11 for group 1 and attributes 12 & 13 for group 3 the group rules would be:

```
1:10|11
3:12|13
```

Change Log

1.0.0

- Initial Release

1.0.2

- Added option to change script path
