Features

LG TinyMCE creates a new custom field type that replaces the default textarea field with a TinyMCE WYSIWYG editor.

LG TinyMCE also supports .gzip output using the TinyMCE Compressor making the download 75% smaller.

Extension Settings

Requirements

LG TinyMCE 1.3.0 is an ExpressionEngine extension and has been tested on ExpressionEngine 1.6.0+ with TinyMCE v3.

LG TinyMCE also requires TinyMCE which can be downloaded from the Moxiecode website.

Installation

The LG TinyMCE extension download contains an extension folder and a language file. To install the extension follow the instructions below:

1. Download the latest version of the extension
2. Extract the .zip file to your desktop
3. Copy the `/system/extensions/ext.lg_tinymce.php` directory to your `/system/extensions` directory
4. Copy the `/system/language/english/lang.lg_tinymce.php` file to your `/system/languages/english` directory

> LG TinyMCE does **not** include a copy of TinyMCE or the TinyMCE Compressor. It will need to be downloaded from the developers website.

Activation

This extension has no special activation requirements. To activate:

1. Log in to your sites administration
2. Open the Extensions Manager
3. **Enable Extensions** if not already enabled
4. **Enable** the extension
5. Update the **extension settings**.

Configuration

The LG TinyMCE extension includes a handful settings.

1. Script Path
2. Script Config
3. Enable GZip
4. GZip Script Path
5. GZip Script Config
6. Check for updates

Script Path [required]

```
/scripts/tinymce/jscripts/tiny_mce/tiny_mce.js
```

The path to tiny_mce.js. LG TinyMCE assumes the TinyMCE directory is in `/scripts/`.

Script Config [required]

```
...
```

TinyMCE configuration options. See TinyMCE Configuration for more details.

Enable GZip [optional]

```
Yes|No
```

TinyMCE can be compressed to 75% of its original size if the server supports GZip compression. See TinyMCE

[Compressor](#).

GZip Script Path [required if GZip is enabled]

```
/scripts/tinymce/jscripts/tiny_mce/tiny_mce_gzip.js
```

The path to tiny_mc_gzip.js.

GZip Script Config [required if GZip is enabled]

```
...
```

TinyMCE Compressor configuration options. See [TinyMCE Configuration](#) for more details.

Check for updates?

```
Yes|No
```

LG Twitter can call home and check for recent extension updates. **This feature requires [LG Addon Updater](#).**

Usage

Now that the extension has been installed an setup correctly a new field type will appear when creating custom fields.

1. [Create a new custom field](#) in an existing weblog and choose LG TinyMCE as the field type.
2. Set the default text formatting to **None**
3. Hide the formatting menu
4. Save the custom field
5. Create a new entry in the weblog
6. The custom field will be replaced with a TinyMCE WYSIWYG Editor
